Seamless integration of hearing instruments and modern communication devices

The sonicBLU streaming device allows you to connect your hearing instruments to Bluetooth®-enabled mobile phones.

Turn Your Hearing Instruments into A Hands-Free Headset for Mobile Phones

sonicBLU uses Bluetooth technology to wirelessly send and receive calls from Bluetooth-enabled mobile phones. When a call is received, sonicBLU streams the audio from the phone directly into the hearing instruments—no feedback, no interference. If you have two hearing instruments, sonicBLU streams audio to both devices simultaneously, providing greater audibility than ever before.
